

AT THE CONTROL PANEL

To accelerate in a certain direction, push the joystick in that direction. The longer you hold the joystick in that direction, the faster your speed will be.

To go into Hyperspace, increase your speed to 300,000 km/s. At 250,000 km/s, a warning buzzer sounds to let you know you're approaching Hyperspace.

To brake, press the space bar. If you are in Hyperspace, pressing the space bar brings you to an immediate stop. If you are traveling at a speed less than 300,000 km/s, each press of the space bar reduces your speed by about 50%.

To change your field of vision, hold the joystick button down while you move the joystick to the right or to the left. NOTE: This will not change the direction in which you are moving.

To select your power level, press H for High Power or L for Low Power.

To engage the automatic landing system, press A when the Planet/Moon Finder blinks and beeps. NOTE: There is no special landing area on Halley's Comet; simply fly into the comet to "land" on it.

To blast off from a planet or moon, press B.

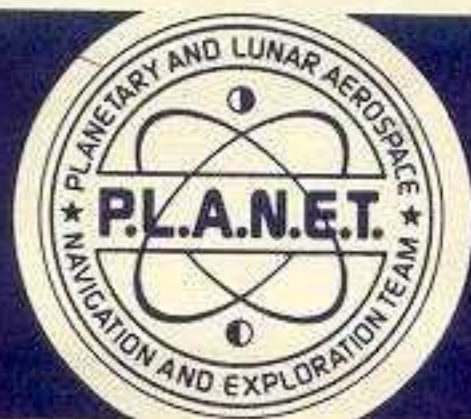

To see the Radar Screen, press R on the keyboard.

THE RADAR SCREEN

To zoom in, push the joystick forward. This will put you at a closer vantage point, but may not give you a full view of all the planets at once.

To zoom out, pull back on the joystick. This will give you a view of all the planets at the same time.

To return to the Control Panel, press R on the keyboard.

Halleygram

Attention:

All Starbird Pilots

Please stand by for top-secret transmission . . . Instructions for final, eleventh mission of The Halley Project follow . . . Observe special launching procedures to preserve secrecy of mission: To start, select Starbird mission, but ignore first Starbird destination. Repeat: ignore first Starbird destination. Go to Earth instead. To receive next destination, type this special code upon landing on Earth: MINDSCAPE.

Follow Standard Halley Project Operating Procedure (S.H.P.O.P.) from here on. As always, you will receive clues for remaining destinations while in flight.

Good luck and solar salutes to all Starbird pilots. If successful, use enclosed card to notify P.L.A.N.E.T. Headquarters. All entries must be received by April 1, 1986. The possibility of reward may await for the fastest pilots. . . . End.

In recognition of the high standards of performance met by
P.L.A.N.E.T. High Command hereby certifies that

Major C. H. Buse

has completed all training missions, thereby qualifying for

THE HALLEY PROJECT.

Grants this certificate of qualification for one hundred and eighty-six days

Cecil Ross Calloway

Secretary General
