MOVEMENT

All movement in Autoduel® is controlled with a joystick. In town or on the road, simply push the joystick lever in the direction you wish to travel. On the road or in the Arena, the further the joystick is moved from center, the faster your vehicle will go—up to its top speed. Centering the joystick will cause your vehicle to coast to a stop, while pulling the joystick in the opposite direction of travel will result in a braking action and eventual reverse movement.
