SAFETY PRECAUTIONS

Please take time to read the important instructions in this booklet. Observing the step-by-step instructions and complying with the warnings will be your personal guarantee to greater game satisfaction over a long period of time.

SAFETY PRECAUTIONS

1. Avoid subjecting this high precision GAME PAK to extreme temperature variances. Store at room temperature.
2. Do avoid touching terminal connectors. Keep clean by inserting GAME PAK in protective storage case.
3. Never attempt to disassemble your GAME PAK.
4. Use of thinners, solvents, benzene, alcohol and other strong cleaning agents can damage the GAME PAK.
5. For best results, play the game a distance away from your television set.
6. Pause for 10-20 minutes after 2 hours or more of continuous game playing. This will extend the performance of your GAME PAK.
GETTING STARTED

1. Insert the **DUCKTALES** GAME PAK and turn on your Nintendo machine. The title page will appear. At this point, you may choose the difficulty level. By pressing the control pad left or right, you can choose either Easy, Normal, or Difficult. To begin the game, press the start button.

2. The LAND SELECT screen will appear. This screen shows **Uncle Scrooge** at the helm of his control console in Duckburg. Here you can choose in which of the five treasure areas to begin your adventure. Use the control pad to move the glowing ball to the land of your choice, and press the **A** button to start your quest.

CONTROLLING UNCLE SCROOGE

The controls for Uncle Scrooge are simple, but true mastery will take both practice and skill.

Pushing **RIGHT** and **LEFT** on the controller moves Uncle Scrooge right and left. This works even when he is jumping or falling. **REMEMBER THIS!** It is a very important feature.

**UP** and **DOWN** are used for climbing up and down ropes, chains, and vines. Any time the pad is pushed **UP** and Uncle Scrooge is over a rope, chain, or other climbing surface, he will immediately start climbing.

The **A** button is used for jumping. There are two types of jumps that Uncle Scrooge can do. The first is a regular jump. The longer you hold down the **A** button, the higher he can jump. If Uncle Scrooge is holding still on a vine or chain when you try to jump, he will fall. Pushing **UP** while he is falling will stop the fall.

The second type of jump that Uncle Scrooge can do is the Pogo-jump. This is a way he can travel over dangerous ground, and repel certain enemies. This move can be tricky. To Pogo-jump, press the control pad down, press the **A** button (the jump button), and while
CONTROLLING UNCLE SCROOGE (cont.)

Uncle Scrooge is in midair, press the B button. You MUST press the B button before he lands, or the Pogo-jump will not work. Uncle Scrooge will continue to pogo as long as you hold down the B button. You can use the control pad to direct Uncle Scrooge while he is Pogo-jumping. It is sometimes possible to make him swing his cane while he’s jumping.

The Pogo-jump is one of the ways that Uncle Scrooge can open treasure chests and remove rocks from his path. The other way is by “swinging” his cane. To make Uncle Scrooge swing his cane at an object, push RIGHT or LEFT on the control pad, (depending on which side the object is on), and press the B button. If there is no treasure within the object, Uncle Scrooge will just shake with the impact of the swing.

The Start button is used for pausing the game and reviewing the special items that Uncle Scrooge picked up through his adventure.

One final note: When Uncle Scrooge is damaged, he is invulnerable for a second or two. Take advantage of this time to get past tough opponents.

**DUCKTALES STORY**

Uncle Scrooge is a world class millionaire and a lover of adventure. His goal this time is to obtain the five lost treasures that were scattered throughout the world. He is off on his adventure with the help of Huey, Dewey, Louie, and Webby. They will travel with him through the jungles of the Amazon, the snow-topped peaks of the Himalayas, the haunted house in Transylvania, the subterranean mines of Africa, and to the surface of the Moon. How many of the lost treasures will you be able to find?

**THE COCKPIT INSTRUMENT PANEL**

During each adventure, an instrument panel appears above the gameplay area. This will show the current status of Uncle Scrooge's progress in each land. The various cockpit indicators are as follows:

1. **Hit Points:**
   - When damage is done by the enemies, etc., the color changes from red to yellow.
   - When all turn yellow, one player is out.

2. **Land Money:**
   - Money collected for that land. When the player is out, this figure goes back to zero.

3. **No. of Players:**
   - When there are no more players, the Game is over.

4. **Total Amount:**
   - When the land money is brought back to the Control Room it is added to the total for the Game.

5. **Time:**
   - When the time indicates zero, one player is out.
THE CONTROL ROOM

The Game starts at this Control Room. You can start the Game at any of the five lands that are offered. You cannot choose a land that you have previously cleared.

When you come in contact with Launchpad, (who is standing within the various lands), he will ask you if you wish to return to the Control Room or not. If you choose "yes", you will return to the Control Room temporarily. Once there, you can put the money you collected into the safe, (Total Money score). Launchpad can only be used once in each land.
