KONAMI INC. LIMITED WARRANTY

KONAMI warrants to the original purchaser of this Konami software product that the medium on which this computer program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This Konami software product is sold "as is", without express or implied warranty of any kind, and Konami is not liable for any losses or damages of any kind resulting from the use of this program. Konami agrees to replace this software, for a period of ninety (90) days after date of purchase, if the software is not working properly. This warranty does not cover loss or damage to the medium, or loss or damage resulting from improper use. This warranty is for the original purchaser only, and is not transferable.

This software is not applicable to normal wear and tear. This warranty shall not be applicable if the Konami software product has been altered in any way, including, but not limited to, modifications, repairs, or additions. Konami is not liable for any losses or damages resulting from the use of this software product, including damages resulting from the loss of data or loss of use of the Konami software product. Konami is not liable for any incidental, consequential, or special damages resulting from the use of this software product, including loss of profits or loss of use of the Konami software product.

This warranty gives you specific legal rights, and you may have other rights that vary from state to state.

This game is licensed by Nintendo for play on the Nintendo Entertainment System.

CONGRATULATIONS!
You now own the authentic Konamihome version of TOP GUN™—The Second Mission. We suggest that you read this instruction manual thoroughly before playing the game.

THE MAGNIFICENT F-14 TOMCAT

Though it's nicknamed the Tomcat, the F-14 loves nothing better than a good old fashioned dogfight. With killer missiles hanging from its underbelly, it always goes for the enemy jet's jugular.

HOW TO PLAY

With bogeys hot on your tail, you must skillfully maneuver your F-14 Tomcat through stage after stage of gut-wrenching warfare.

At the beginning of each stage you'll choose from an array of missiles, including the Phoenix, the Sparrow and the ever trusty Sidewinder. To help you fight fire with fire, you'll also have the mega-blasting Vulcan Cannon.

To begin your mission, select either ONE PLAYER, TWO PLAYER DOGFIGHT. Then press the Start Button.

THE GUIDANCE SYSTEM FOR AN F-14

CONTROL PAD

- Hold the B Button down to fire your Vulcan Cannon.
- When the target enters your sights, it will automatically lock onto your fighter's computer [as indicated by arrow]. When this occurs, press the B Button twice to fire one of your missiles.

START BUTTON

Press to begin your mission.

SELECT BUTTON

Press to select your mission.

A BUTTON

Press to switch from screen to screen and to select your missiles.

The A Button also controls your speed. Hold it down to increase your velocity. Release it to slow down.

Note: The slower your speed, the easier it is to zero-in on the target. When your afterburners are fully throttled, you've got a better chance of dodging enemies that have locked onto you.

B BUTTON

- Hold the B Button down to fire your Vulcan Cannon.
- When the target enters your sights, it will automatically lock onto your fighter's computer [as indicated by arrow]. When this occurs, press the B Button twice to fire one of your missiles.

CONTROL PAD

- This is your guidance mechanism, controlling the F-14's flaps and ailerons, it allows you to change direction on a dime, whether you want to roll, loop, dive or set the fighter on its tail.
- Special Function: Press the Control Pad Left or Right twice rapidly and you'll make one Barrel Roll. During this Barrel Roll, you won't be able to go up, down, left or right, but you'll have a better chance of avoiding oncoming missiles.
- If you press the Control Pad twice rapidly in the opposite direction during the middle of the Barrel Roll, you'll reverse the roll and revolve back to your original position.

ANOTHER GUN™ School: they call these maneuvers "ROLLING THE DICE."
THE MAIN MISSION (YOU AGAINST THE WORLD!)

You're the sole pilot between the enemy's Arraseston-bound armada and global annihilation. Talk about a rock and a hard place! To save the day, you must survive and conquer three stages of combat and then return safely through probably severely shot up to base.

THE SEVEN DEADLY PILOTS

Baris "Buzz" Bambinsky
Gorky Skyevsky
Igor Gregovich
Dimitri Jettsky
Bobo Babushka
Stalin Fortimesky
Fearless Leader: Cy Beeria

DUELING WITH THE ENEMY

During this intense air combat mission, you'll go one-on-one, missile-to-missile with the computer's most ferocious dogfighters. It's you against them. And each time you send one of these aces spanning to earth, you'll be promoted.

But if a Bande shoots you out of the sky, all you'll get is a purple heart — posthumously of course!
Suddenly, on this mission, your best friend becomes your worst enemy, as he challenges you to an aerial duel to the death.

Might as well wash those fond academy school memories from your brain, when you used to double date with the admiral’s twin daughters. Because now your life is in double jeopardy. And the key to victory is a ruthless determination to not only survive, but to prevent your friend/foe from getting a big head!

When the opening selection screen appears, you’ll see a mode option. Select this option and you’ll switch to a screen that will allow you to change your mode of flight from NORMAL to REVERSE. To choose your mode, press the Control Pad Left or Right.

At this time, you can also turn the music ON or OFF by pressing the Select Button.
CHOOSING YOUR MISSILES

The Trusty Sidewinder
Narrow missile sights

The Jet Eating Sparrow
Medium missile sights

The Indubitably Deadly Phoenix
Wide missile sights

All great pilots realize the most critical decision he or she will ever make takes place on the ground. That's when the missile selection is made.

The reason this decision is so life-sustainingly important, is because certain missiles are more effective against certain targets. And if your fighter is armed with the wrong missiles... well, let's just say you'd better see your lawyer about writing a will.

To select your missiles, press the Control Pad Up or Down. Next, press the A Button to attach your choice to the F-14's wings.

THE ALERT LAMPS

- The Danger Lamp
  Flashes when enemy comes into your field of view.

- Lock-On Lamp A
  Flashes when the enemy has locked onto you.

- Lock-On Lamp B
  Flashes when you've locked onto an enemy.

- Rotation Lamp
  Flashes during a Barrel Roll, when your fighter begins pulling Gs.

LANDING YOUR FIGHTER

At the end of each stage in the MAIN MISSION and after every DUEL WITH THE ENEMY, you must return to the carrier and land for refueling and a fresh supply of missiles.

HOW TO LAND (CALLING THE BALL)

To ensure a safe landing, press the Control Pad to maneuver your aircraft into proper landing position. Also use your A and B Buttons to match the speed displayed on your radar. Remember: The A Button speeds up your fighter, while the B Button applies the Air Brakes.
YOUR ARCH ENEMIES

The Black Jack Bomber

The Misha Marauder

The Red Tide Nuclear Attack Sub

The Hind-Alpha Death Chopper

The Star Wars Space Shuttle

The Fire Storm Fighter
Treat Your Konami Game Carefully

- This Konami Game Pak is a precision-crafted device with complex electronic circuitry. Avoid subjecting it to undue shock or extremes of temperature. Never attempt to open or dismantle the Game Pak.

- Do not touch the terminal leads or allow them to come into contact with water or the game circuitry will be damaged.

- Always make sure your NES Control Deck is SWITCHED OFF when inserting the Game Pak or removing it from the NES Control Deck.

- Never insert your fingers or any metal objects into the terminal portion of the expansion connector. This can result in malfunction or damage.

COMPLIANCE WITH FCC REGULATIONS

This equipment generates and uses radio frequency energy and if not installed and used properly, it is susceptible to interference which may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Relocate the receiving antenna.
- Relocate the NES with respect to the receiver.
- Move the NES away from the receiver.
- Plug the NES into a different outlet so that the equipment and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful: "How to Identify and Resolve Radio-TV Interference Problems." The booklet is available from the U.S. Government Printing Office, Washington, DC 20402, Stock No. 004-000-00445-4.
